## PROJECTS

### **Project 1 : AARUMBH**

Brief description :

Transform Young Adults To Highly Capable & Confident Professionals  
In a complex, tech-driven, and hyper-competitive business world it is increasingly becoming a struggle to perform well. The academic degrees (whatever the discipline) and domain skills (whatever may be the field) are simply not good enough. Performance falters in the absence of certain professional skills.

Aarumbh has designed a program to address the gaps in professional skills. It helps transform employees into highly capable and confident professionals who, not only are able to add value to the organization but also successfully navigate the vicissitudes of modern business life. The program will particularly benefit those who are

- 1) In client-facing roles
- 2) Required to solve complex problems (internal or for customers)
- 3) Working in teams that requires constant interaction and collaboration.
- 4) In roles that demand a high degree of ownership.

Roles and Responsibilities:..

Flutter Front End Developer

Technologies: Flutter Framework

### **Project 2 : Genius Parents**

Brief description :

This project is to develop a mobile application for parents and children to help families

become ready for school and for life. The app mainly focuses on early childhood education.

The key feature of the application is its weekly curriculum, which is designed to provide

progressive learning opportunities to children.

Roles and Responsibilities:..

Support

Technologies: Java, Spring Boot, Data JPA, Hibernate ORM tool, RESTful Web Services

### **Project 3 : Scalar File Management**

Brief description:

This project is developing an application using Scalar DB and Scalar DL to make

the application Tamper Evident. The application provides storage where users can store the

file, secured a file, and share the files with multiple users/groups.

Roles and Responsibilities:..

Flutter Front End UI Developer

Technologies: Flutter Framework
